

Water Risk Assessment in Cane Farmers in 2025 (by WWF Water Risk Filter)

Location	Province	Number of Significant Tier-1 suppliers	Number of Tier-1 suppliers	Water Physical Basin	Latitude	Longitude
MSB	Sing Buri	24	2,067	3.69 (High Risk)	14.85998	100.35977

Exposure of suppliers to water stress area

The calculation method should be as follows:

1. Assessed the location of factories and sugarcane farms of farmers that we purchased where exposed in the water stress area by using WWF Water Risk Filter tool.
2. The ton of sugarcane from significant tier-1 suppliers that Mitr Phol purchased in water stress area was calculated.
3. The total tons of sugarcane that Mitr Phol sourced was calculated.
4. Calculate the % of sourced sugarcane originating from water-stressed areas.

The ton of sugarcane from significant tier-1 in water stress area (MSB)	558,000	Tons
The total tons of sugarcane that Mitr Phol sourced	18,620,000	Tons
% of sourced sugarcane originating from water-stressed areas	3%
